A GUIDE TO PALLETIZING WHEELS

OVERVIEW

PALLETIZING GUIDE

2026

Palletize Alloy & Steel Wheels Separately

ALLOY

STEEL

PALLETIZING PROCESS

- Alloy: 5 wheels per layer
- Steel: 6 wheels per layer
- Stack at least 5 layers tall,
 - at most 9
- Cardboard between each layer

PREPARING FOR TRANSPORT

Shrink-wrap the pallets once
stacked properly with cardboard

LOADING THE PALLETS

Double-stack the pallets in the trailer for shipping:

Load the bottom 2 pallets side-by-side,
Then, load the top 2 pallets side-by-side

LOOSE LOADING

IN FULL-SIZE SEMI OR PUP TRAILER

Stack 8-9 wheels high

From the back of the trailer, out

Place pallets between the wheels and the door to brace the load
